Personalized goals and a relentless focus on outcomes set South Cove Manor at Quincy Point apart from other rehabilitation centers and care communities.

Rehabilitation success

- Each person's rehab goals are as unique as they are.
- The resident is at the center of the rehabilitation process.
- Rehab strategy is crafted by the therapy and nursing teams with active input from each resident and their family.
- Our discharge to home rate with superior functional improvement surpasses state and national averages.

We make returning home possible

Our high number of patients returning home isn't magic—it is the culmination of weeks of carefully integrated therapeutic strategies and a lot of hard work.

We provide:

- 360 degree functional assessments
- Self-care skill development in our simulated home setting
- Personalized education on medical management
- Extensive caregiver training
- Home visits and evaluations when needed
- Community outings to build skills and confidence

"I was so relieved to be able to come to South Cove—this is the nicest rehab center I have ever been to. It's beautiful, and it's spotless! The therapists are very well trained. I work really hard, and it will take some time, but I know I will get better and be able to go home soon."

Marjorie C.
Rehabilitation patient

"The staff is especially kind, considerate, and thoughtful, and always trying to do little extra and special things for our Mom. They have always been there for her, and for us!"
